## Cable Seal 150

The Cable Seal 150 is a versatile indicative cable seal. The steel wire seal features a high-quality aluminium housing and a steel wire with a diameter of 1.5 mm.

When the steel wire is broken, it will immediately fray, preventing fraud and reuse. The Cable Seal 150 has a breaking strength of 330 kg and can therefore only be broken with a proper pair of pliers.

This type of seal is mainly used for sealing catering and duty-free trolleys, as well as IBCs, trucks and train wagons.

### Properties

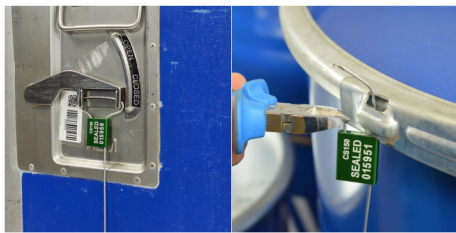

- Security Seal with high breaking strength of 330 kg
- Flexible steel wire; suitable for tight openings and bent latches
- Steel wire (1.5 mm) frayed when broken, making reuse impossible
- Suitable for sealing flanges, couplings, and trolleys with valuable items
- Provided with a one-off unique imprint and ascending numbering

### Specifications

Material: Aluminum alloy body, zinc extrusion lock & galvanized steel aircraft cable wire  
Dimensions: Cable diameter 1.5mm, locking body 26x22x6mm, cable length 300mm  
Printing area: 26x22mm  
Tensile strength: 330kg

### Applications

Trailers, lifting equipment, doors, tankers
